

Infeed of protective bottom sheets

AVN UB 15

■ Application Description:

The bottom sheet is dispensed at the infeed of the machine and cut according to format length. The Underwrapper is easily accessible and the time required for fault clearance is therefore reduced to a minimum.

The Underwrapper UB 15 provides newspapers, magazines and similar print products with a protective bottom sheet of paper.

Infeed of protective bottom sheets

AVN UB 15

■ Technical Data:

Field of application: Graphic Arts Industry

Performance Range: Underwrapping: 30 bundles/min

Employment: Width 150-420, Length 150-420, Height 5-400

Weight (kg): approx. 150

Dimensions (mm):
- Length approx. 850
- Width approx. 900
- Height approx. 1,300

Electrical rating (kW): 1,00

Air consumption
(l/min at 6 bar): 112

Packaging material: Kraft paper max.80 g/m², Reel diameter max. 400 mm,
paper width max. 450 mm

Ancillary equipment: - Height sensor
